

SHUTTLE PRO Payment Methodes

ELECTRONIC Payment Methods

For users who prefer online payments are available following electronic payment methods:

1. Stripe
2. PayPal

Understanding Electronic Payments:

Electronic payments involve transactions where the customer completes the payment using an online platform. Upon selecting an electronic payment method, the customer is redirected to a secure payment gateway (such as Stripe or PayPal). Here, they can enter their payment details in a safe environment, which helps to prevent unauthorized access and fraud. After completing the payment, the transaction is processed instantly, and if the order status changes, the customer receives a notification.

NON- ELECTRONIC Payment Methods

3. Wire Transfer - customers can pay through a bank transfer. (via Invoice doc)
4. Credit Card on Pickup - customers have the option to pay with a credit card when they will be transfer on the location. To the driver via mobile bank POS (BOG and TBC)

Understanding Non-Electronic Payments:

Non-electronic payments mean that the customer is not redirected to an external payment gateway. Instead, the booking administrator receives information about the selected payment method (in the booking details). It is then the responsibility of the administrator to arrange how payments are collected, whether directly on-site or through other arrangements.
